The DCT Guest
Speaker Series
Presents

James M. Mwape E-ZPass IAG

February 26, 2010

1:00 p.m.

**Composites Manufacturing Science Laboratory (Room 106)
(Academy Street and Delaware Avenue)
University of Delaware
Newark, Delaware**

The Delaware Center for Transportation welcomes James Mwape to our Distinguished Speaker Series. Mr. Mwape will discuss Electronic Toll Collection (ETC) and how it increasingly saves time, money, and environmental impacts.

There are an estimated 28 million ETC transponders in use in the US alone, and there are a number of recognized brand names for these systems across the country. While we in the northeast recognize E-ZPass, Florida has the SunPass, and Texas has TxTag. US Department of Transportation's push by interoperability in the tolling industry creates new challenges and opportunities and Mr. Mwape will speak of the difficulty in finding ETC knowledgeable graduates and describe potential career opportunities.

Delaware Department of Transportation's P.J. Wilkins is currently the Chairman of E-ZPass's Interagency Group Executive Committee.

Anyone interested in the transportation field and the growth of ETC systems is welcome to attend.
